THE ORCHID TREE (Bauhinia purpurea). Large, colorful orchid-like flowers borne in great profusion.

RANCHO SANTA FE, CALIFORNIA

SAN DIEGO

grown Rare Plants

AUCUBA japonica variegata. Leaves very large, dotted with gold, tropical appearance. Gal. cans, \$1.25; 5-gal. cans, \$2.50.

BAUHINIA purpurea (Orchard Tree). An evergreen flowering tree of unusual beauty. Flowers are dark pink to purple with light yellow marking, measuring 3 inches across and are borne in great profusion. This is one of the most beautiful of all flowering evergreen trees and should be planted more. Gal. cans, 50c; 5-gal. cans, \$1.75.

CAMELLIA Japonica. Evergreen, eventually 6 to 10 feet. Beautiful wax-like flowers, blooming in winter. Pink, white and red varieties with some variegated. Stands frost, likes shade. Varieties: **Cheerful, Pink Perfection, Rosita, Purity and Tricolor.** Specimens, balled, \$2.50 up.

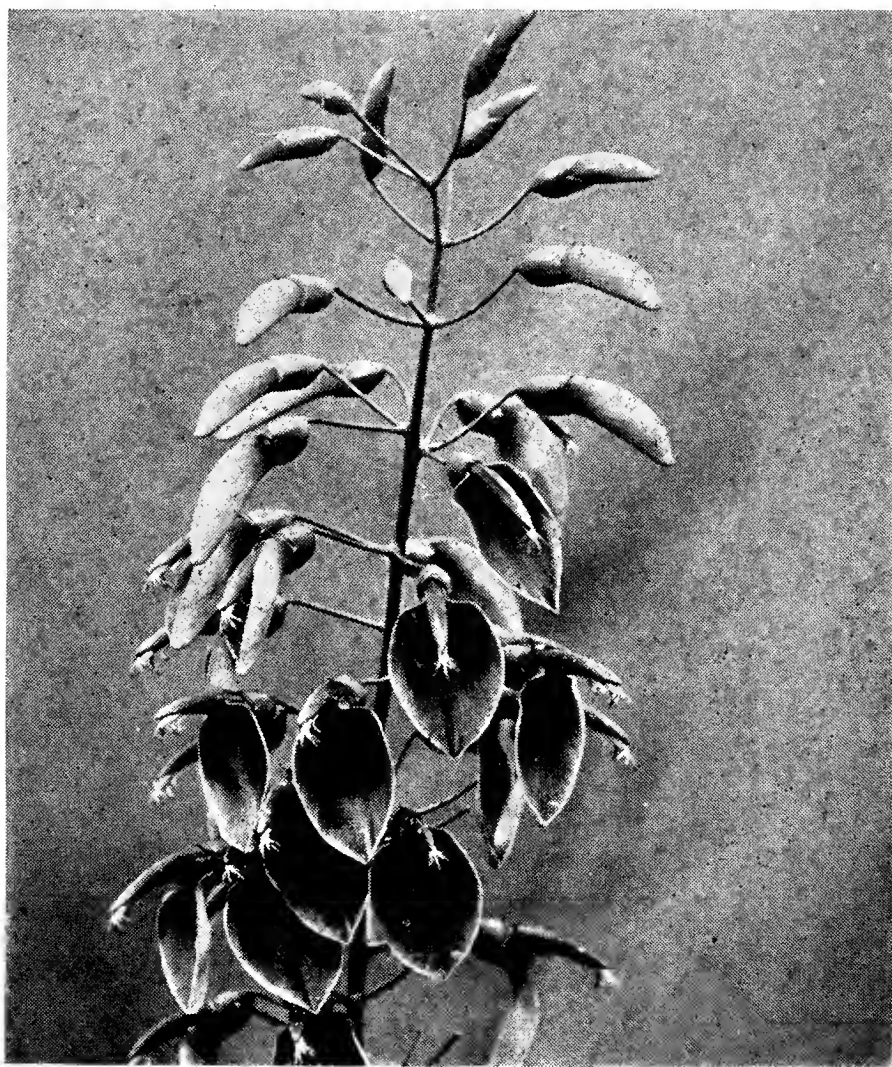

DAPHNE odora variegata. One of our specialties and truly a beautiful evergreen plant. Bright green leaves outlined with a margin of golden yellow. Fragrant flowers borne in small clusters terminating branches cover the bush. Balled 1 to 2 ft., \$2.25.

ERYTHRINA crista-galli (Coral Tree). A deciduous native tree of Brazil. Produces many beautiful butterfly-like crimson to maroon colored flowers. If branches are cut back each year an abundance of flowers will repay you. If you are looking for the unique, try this one. Gal. cans, 50c; 5-gal. cans, \$1.25.

GARDENIA veitchi (Cape Jasmine). Small evergreen shrub. Bright green, shiny laves. Double, waxy, white blossoms deliciously fragrant. Gal. cans, 75c; balled, 1 ft., \$1.25.

G. grandiflora. Larger flower, stronger grower. \$1.50.

MAHONIA japonica (Japanese Mahonia). A fine evergreen plant for shady locations. Large holly-like leaves shaded in yellow and red; dense clusters of bright yellow flowers followed by large blue berries. Balled, \$1.25.

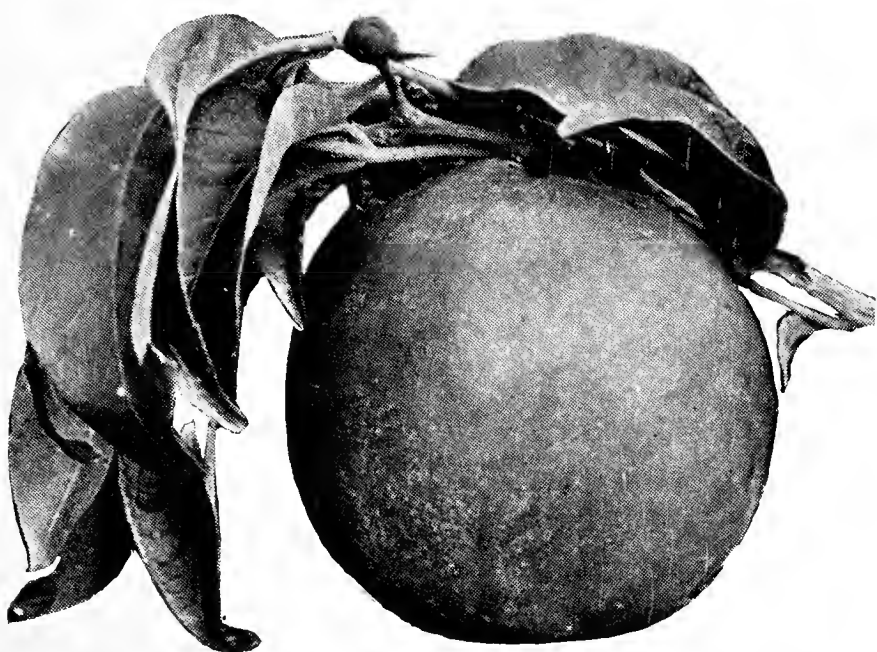

ERYTHRINA crista-galli (Coral Tree)—Striking and unique with its butterfly-like crimson flowers in late spring.

WE GROW CITRUS FRUITS FOR C

X SUEBELLE SAPOTA

The New Subtropical Fruit

Our very favorable location is greatly responsible for the wonderful stock we are able to offer here. Every garden lover living in this mild climate should certainly have a few of these choice plants. Try some of the odd and rare varieties, you will be delighted with results.

SUEBELLE SAPOTA—Our own propagation. You'll like its rich, custard-like melting flesh. A continuous producer in this mild climate.

SAPOTA. We are propagating the **Suebelle**, a new variety which we have named and are putting on the market for the first time. It is an evergreen tree, of spreading habit, and does exceedingly well along the coast and in the mild foothill regions, standing temperatures to about 27 degrees. The **Suebelle** has many qualities we have never found in other sapotas, outstanding of which, is its freedom from a ginger taste found in the skin of so many other varieties, and its continuous bearing qualities just about parallels the lemon. The fruit may be eaten like an apple and its rich custard-like melting flavor will make you ask for more. Balled, 2 to 3 ft., \$4.00 each.

CHERIMOYAS. The tree is large, evergreen and very ornamental. The fruit is heart-shaped, rough skinned and weighing 1½ to 3 pounds. Its custard-like flesh is delicious. Plant one of the following varieties, this year, you'll like them: **Deliciosa**, **Booth**, **Dr. White**. Budded trees. Extra strong field grown stock, balled, \$2.25.

NATAL PLUM (*Carissa grandiflora*). 5 to 6 ft. Fragrant, white, jasmine-scented flowers. Small red fruit resembling plums. Used in the same manner as cranberries. Gal. cans, 50c; 5-gal. cans, \$1.50.

QUEENSLAND NUT (*Macadamia Ternifolia*). Flavor of Brazil nut. Very ornamental. 6-in. boxes, 1 to 2 ft., \$2.00.

GRANADILLA (*Passiflora edulis*) (Passion Fruit). Evergreen, rapidly growing vine with beautiful blue flowers. Fruit about the size of a hen's egg, dull purple, aromatic and spicy. Can be eaten fresh, but is usually used for jams and flavoring. Gal. cans, 40c.

STRAWBERRY GUAVA. Fruit about the size of a large strawberry, reddish-brown. Desirable as a table fruit or for jams and jellies. Gal. cans, 50c; balled, \$1.50.

YELLOW STRAWBERRY GUAVA. Fruit larger than the red variety and yellow in color. Gal. cans, 50c; balled, \$1.25.

LEMON GUAVA. Entirely distinct from Strawberry Guava; Large yellow fruit, seeds very small. Gal. cans, 50c.
